Publish your jobs across your social media pages with just one click ...

- Our Career Portal provides you with the ability to publish your vacancies not only to the portal but also across your social media pages with just one click.
- The integration with your social media pages ensures that you have consistent and aligned news feed and posts across all the platforms, not to mention the time saved if you were to post the vacancies in each social media page one at a time.

Extend your sourcing channels beyond your Career Portal ...

- We have designed our Career Portal in such a way that allows it to integrate to leading market Job Portals (such as Indeed.com and LinkedIn Jobs).
- This ensures that once you publish a new job on your portal, the jobs are automatically copied to these Job Portals (free of cost) expanding on your branding, applicant reach, and sourcing channels.
